1) Executive Summery :- While searching for need of farmers we got to know that there is no specific or dedicated app or website which woul help the farmer to get suggest good quality of farming essencial thing or & connect them with all goverment scheme

2) Project disciiption :- Project purpose is to connect farmer to of India to a platform where they can search fore good quality farming essencials & goverment scheme. current solution is to built an app for such things. Challanges of which we will face during this thing is that are to built a good team testing & deployment. i undertake these do project because there are many small farmer those who are not aware about such thing to scive there many. I am working on this project

Project Scope :-

Requirment analysis :- to gather information about all government scheme of as farming essencial. need to find invester some ads adds.

task :- task is to find good team member distribute work into team member. appoint 2 member from each bember 1 from farming essencial boground of another from goverment scheming boground. take a feedback from some farmer about. crops

Cost :- in case of farming essencial we will make alternative for the product. which are costely to affort any farmers. Cost to make this app is 1 lakhs.

Dedline :- We are suppose to give some dedline to the developing team because we are suppose to test the app by some parameter to make sure that our app is ready to lauch for that we need almost 6 month time duration
